

Marisol Valencia Cardona

Front-End Web Production Specialist | Technical Landing Pages | Lead Capture Pages

WhatsApp: +57 316 785 0234 | Email: marisol.valencia.ops@gmail.com

Portfolio: [Front-End Web Production Projects](#)

Colombia | GMT-5 | Remote

Professional Profile

Front-end web production specialist focused on creating clear, responsive HTML/CSS landing pages, product pages, pricing pages, demo request pages, and reusable web assets for technical teams, SaaS companies, agencies, and product marketing teams. Skilled in HTML, CSS, responsive design, GitHub Pages, template-based structures, and AI-assisted workflows for layout refinement, troubleshooting, and efficient production.

Detail-oriented and organized, with the ability to translate technical information, business content, visual references, and page structures into clear, mobile-friendly web pages. Strong background in content structure, visual organization, professional communication, and client-facing digital materials.

Technical Skills & Tools

HTML | CSS | Responsive Design | Mobile-Friendly Layout | Flexbox | CSS Grid basics | Media Queries | GitHub Pages | Reusable HTML/CSS Templates | Lead Capture Forms | Google Apps Script | Python-assisted template workflows | AI-assisted coding workflows | Canva | Snagit | Camtasia | Google Workspace | ChatGPT | Gemini | Claude

Selected Projects

Technical Service Landing Page – Front-End Web Production for Technical Teams

Responsive HTML/CSS landing page designed to explain a technical service clearly, present the value of front-end production support, and guide technical teams toward contact or collaboration.

SaaS Pricing Page – Plans & Comparison Page

Responsive HTML/CSS pricing page designed to present plans, compare features, highlight value, and guide visitors toward a trial, demo, or purchase decision.

Demo Request / Lead Capture Page – Technical Lead Capture Page

Responsive HTML/CSS page designed to capture demo requests or qualified leads through a clear CTA, focused form structure, trust elements, Google Sheets data organization, and Google Apps Script integration.

Relevant Experience

Independent Web Production Practice | 2023 – Present

- Built and refined responsive HTML/CSS layouts for landing pages, product pages, pricing pages, demo request pages, reusable templates, and commercial web assets.
- Developed page structures with hero sections, problem/solution blocks, feature sections, pricing areas, trust elements, CTAs, forms, and contact sections.
- Used CSS to refine spacing, typography, visual hierarchy, responsive behavior, backgrounds, image placement, and layout consistency.
- Created reusable web assets and templates designed for technical communication, commercial presentation, and scalable content updates.
- Used Google Sheets and Google Apps Script to support lightweight lead capture and organized follow-up workflows.
- Used Python-assisted and AI-assisted workflows to support template production, code refinement, layout troubleshooting, content structure, and quality review.

Professional Communication & Learning Materials Design | Previous Experience

- Designed educational and professional communication materials in Spanish and English.
- Adapted complex content into clear, structured, and visually organized formats for different audiences.

Education

Master's Degree in English Didactics – Universidad de Caldas

Postgraduate Specialization in Human Potential Development in Organizations – Universidad Antonio Nariño
